Coursework Timeline

- Competitive applicants will have the Recommended or Required coursework completed by the application deadline.
- Applicants to the summer/fall term may be asked to submit spring final grades, this is not a guarantee.
- Summer coursework will not be considered for summer/fall applicants.
- Fall coursework will **not** be considered for spring applicants.
- · Applicants to the spring term should have the Recommended or Required coursework completed by the end of Summer II semester before applying.

Additional Transfer Requirements

- Transfer applicants should have completed a full semester (spring or fall) course load of 12 transferable hours (minimum) after graduating from high school.
- The Department of Maritime Administration is looking for students who are interested in pursuing our degree as a focus. Students should indicate our department as the primary major they are interested in if they wish to be admitted. The essay and supporting materials should reflect that the student is interested in pursuing our degree.
- Meeting minimum requirements does not guarantee admission. The entire record is reviewed for consistency in coursework and grades. Admission preference is given to applicants with the highest GPA and the most appropriate courses completed.

Additional Information

- Applicants should be serious about earning a degree in Maritime Administration.
- Transfer applicants are instructed NOT to accept transfer admission to any major with the expectation of later applying for an on-campus change of major.

Career & Educational Opportunities

The Maritime Administration undergraduate curriculum provides a solid background in the key areas of accounting, finance, marketing, law, economics, and mathematics that are critical for today's business professional. These courses lay the foundation for more advanced courses in international trade, inland waterways management, brokerage and chartering, organizational behavior, transportation economics, port and terminal management, and other areas related to the maritime industry.

International trade is expanding as a result of the general increase in world-wide economic and political stability and this trend is expected to increase, as major economies such as China and Russia participate more fully in world-wide economic growth. The great majority of this expanded trade will be carried by ship. As a result, activity in American ports is expected to more than double in the next 20 years, and some ports in the Gulf of Mexico are expected to see a tripling of port activity. Additionally, the next 40 years will see greatly expanded oil and gas production in the deep waters of the western Gulf of Mexico. Taken together, these forces are now and will continue to positively affect demand for trained maritime professionals ashore. Maritime Administration graduates are ideally poised to meet the increasing demand for well-educated maritime professionals. For more information please visit <u>careercenter.tamu.edu.</u>
