

## Marine Technology Society Dynamic Positioning Scholarship

**Established in 2009 by the Dynamic Positioning Committee of the Marine Technology Society (DP)**

The Marine Technology Society promotes awareness, understanding, and the advancement and application of marine technology. Incorporated in 1963, the international society brings together businesses, institutions, professionals, academics, and students who are ocean engineers, technologists, policy makers, and educators.

The Society publishes a peer-reviewed journal — *The Marine Technology Society Journal*. It has three technical divisions and 31 Professional Committees (technical interest groups). The society hosts several conferences yearly. Additionally, it supports 13 Sections, which focus on events and programs unique to their geographic areas, enhancing networking among local colleagues, businesses, universities, and government/military offices.

The Dynamic Positioning Committee was established to provide a consistent forum for exchange of information, discussion of technology, training and education, improvement of reliability, review of existing and proposed guidelines and/or regulations, and any other issues pertinent to dynamic positioning and consistent with the objectives of the Marine Technology Society.
